<				×		

Note:

- When depreciating a sold item, the 'Depreciate to or end of year date' will be the disposal date if the disposal date is earlier than the end of year date
- end of year date will default to +1 year from the last depreciation run
- Depreciation report now includes report options to select either all the assets for display or only those depreciated in the current run

### In Bulk via Asset Depreciation

- Please take a backup of your database before using this option. Bulk asset depreciation is NOT reversible.
- It is advisable to execute a Test Run which will show a depreciation forecast without updating the database.
- Report options do NOT affect depreciation; they are simply used to select what assets you would like to see on your report. See next section for breakdown of report options.

### **Report Options**

RP Depreciate Assets			
Financial End of Year Date (date	to depreciate to inclusive) 01/01/1	7	
Is this a test run? O Yes - It's a Test Run No - Update Asset Register Monthly or Yearly Monthly Yearly Yearly Print Depreciation Schedule To O Don't Print Printer Screen Word Processor CSV File		Report Options (does not affect depreciatio Include Only assets processed in this run Include assets Include assets sold after this date	
Depreciation Basis : Tax European Tax Law is Used		☑ Assets with 0% depreciation rate	
This feature will depreciate all as Once complete, the depreciation program will prompt you wheth Warning - Please check all of backup. This procedure is n			

These options only affect what is displayed on the final report and do not affect which assets are depreciated.

#### Include - only assets processed in this run

• This option will display only assets that needed depreciation in this run (not previously depreciated to the selected end of year and has a cost price entered).

NOTE : This is the option selected for the test run.

#### All current assets

• Display all assets that were purchased before the 'end of year' date.

#### Include assets sold after this date

• will allow old sold assets to be excluded from the report.

### Assets with 0% depreciation rate

Include or exclude assets that have no depreciation rate (are not being depreciated)
