

Miscellaneous Costs RentalPoint V11

Miscellaneous Costs are extra costs that can be added to a booking. These costs are not necessarily found in your inventory setup (F10), however they are common costs that will be used and re-used on many bookings. Setting up costs ahead of time can speed up the booking process as you don't have to write a full description and price every time you enter the cost into a booking. To configure your costs go to **Setup** and click **Miscellaneous Costs**.
