

Server sizing chart for RentalPoint Software

This chart shows the size of server that is required based on the number of users for RentalPoint Software.

No. of RP Concurrent user licenses	No. of RP Named user licenses.	ver	Cores	RAM	Hard Drive Space
1 - 5	1 - 10	SBE/Pro	1	1GB RAM	40 GIG
6 - 10	11-20	SBE/PRO	2	2GB RAM	80 GIG
11-15	21-30	PRO/ENT	3	4GB RAM	160GIG
16-20	31-50 *	PRO/ENT	4	8GB RAM	320 GIG
21-25	51-75 *	PRO /ENT	5	16 GB RAM	620 GIG

* The ratio of named to concurrent user licenses increases past 16 concurrent user licenses

The above chart is an indication only and assumes -

- RentalPoint Software will be the only software installed on the server, no Outlook or Exchange server, additional server resources will be required to run additional software.
- The CPU cores are high end Intel Xeon
- There is no room for growth included in the above chart, for example a company with 5 users should allow for growth over the next 3 to 5 years.
